BONE MARROW REPORT FORM

Name	KUNJ	Age	3 ⁴ / ₄	Sex	M	Date	6/11/2019
Hosp. Regn. No.	104857737	Aspirate Report 1	B-2516-19				
Department	HEMAT	Biopsy Report 1	19BX-2391				
Material Sen		Ward/ OPD/ Clinic	C2-18				
		Leucyte Report					

Aspirate Report 1 Peripheral smear is poorly spread. Blasts are seen, however exact DLC is not possible. Bone marrow aspirate - smears are aparticulate & cellular. There are 80% blasts along with few maturing myeloid cells. Megakaryocytes are reduced. On cytochemistry- blasts are negative for MPO, SBB and PAS.

Biopsy Report 1 Small bone marrow biopsy with overall cellularity ~100% shows near total replacement by blasts. All hematopoietic elements including megakaryocytes, erythroid and myeloid cells are reduced.

IMPRESSION: Together with peripheral blood immunophenotyping (19F-327) features are compatible with Pre B -Acute lymphoblastic leukemia.

Radiotherapy opinion for date for RT.

MSO Remarks

- Pt has got an estimate of ₹ 3 lacs and his father has applied for PM Fund but due to delay from his local M.P.'s office the grant has not come yet.
- Advise the pt. to get a duplicate estimate of ₹ 3 lacs and meet Chief MSO as there is a possibility of getting CSR fund for treatment.
